Lectures

"The thing that doesn't fit is the thing that's the most interesting: the part that doesn't go according to what you expected." - Richard Feynman

A young girl copes with her distant and distracted parents by finding guidance in her collection of scientific lectures on VHS tapes. She ventures deep into her own magical internal world in search of a way to mend the unmendable. *Lectures* is a story about youth, trauma, vulnerability, and physics

Cast list:

Sara Jane Munsford

Emily Batsford

Dorothy James
